Policies and Fees Regarding Forensic Services

- Forensic services are not covered by Medicare or other health insurance providers, including for guardianship-related examinations. The costs of these services are incurred by the individual, referring professional, local court, or state agency.
- Please refer to the current fee schedule for clinical and forensic Services document on my website for an updated and complete list of services and fees. My standard hourly clinical rate is \$180. My standard hourly forensic rate is \$225. Travel time is billed at \$140 per hour to help compensate for hourly revenue lost while out of my office and unable to see patients.
- Unless otherwise arranged, payment in full is required before the release of my final report. For services, reports, or testimony that have yet been paid, I expect fees to be paid within 21 days of receipt of my final bill. You should receive an invoice with a few working days after the service is provided.

Cancellation Policies

- I do not charge for cancellations of examination, depositions, or testimony given seven days or more notice.
- For cancellations between 24 hours and 6 days, I charge 50% of my standard clinical rate of \$180 for the total time reserved in my schedule to accommodate the requested service. This does not include charges already incurred for records review, case formulation, consultation, and case preparation, which are billed at my standard forensic rate.
- I charge 100% of my clinical rate when given cancellation notice of less than 24 hours. As above, this does not include charges already incurred at the standard forensic rate.
